Amlak Finance

- The stock traded with a bullish tone in the previous session and closed above the 20day SMA (currently placed at AED1.21) at AED1.22, after making a high at AED1.24.
- On the daily chart, the MACD & RSI are heading higher along with the stochastic indicator attempting to move out of its oversold region, hinting at bullish momentum in the coming session. Moreover, the weekly RSI and stochastic are trading with a slight positive bias, further confirming the above view.
- Crucial resistance is placed at the daily upper Bollinger band (currently placed at AED1.25), a break above which might prompt further bullishness in the stock, clearing way for the 50day SMA (currently trading at AED1.28) and AED1.30 levels.
- On the contrary, intraday support is located at the AED1.20 level, followed by the AED1.19 and daily lower Bollinger band (currently trading at AED1.16) levels.

EMAAR Properties

- The stock traded in the green in the last session and settled at AED6.79, after touching a high at AED6.80.
- Although the daily RSI is moving upwards, the MACD and stochastic are trading with a negative showing, reflecting at a weak technical scenario in the near term. Weekly MACD is heading downwards coupled with the stochastic indicator trading below its 50line, further affirms the bearish view.
- Important support is placed at the 20day SMA (currently placed at AED6.73), followed by the AED6.66/6.63 and crucial AED6.50 levels. A move back below the latter might lead to bearish pressure on the stock.
- On the positive side, key near term resistance resides at the AED6.86 level, followed by the 50day SMA (currently trading at the AED6.92) and psychological AED7.00 levels. A break above the latter might lead to upside momentum in the stock.

First Gulf Bank

- The stock recorded considerable gains in the prior session and ended above the 100day SMA at AED11.90.
- A possible signal line crossover by the weekly MACD from below along with the RSI and stochastic oscillators pointing north, reflects at a strong technical outlook. Likewise, the daily momentum oscillators are trading with a strong bias, further substantiating the above view.
- The 200day SMA (currently trading at AED11.97) is acting as an immediate resistance, a clear break above which might lead to further acceleration to the upside, paving way for the AED12.10 and AED12.20 levels as the next likely resistances.
- On the flipside, key technical support is placed at the 50day SMA (currently trading at AED11.56), followed by the AED11.35 and 20day SMA (currently placed at AED11.23) levels. A breach below the latter might trigger weakness in the stock.

SHUAA Capital

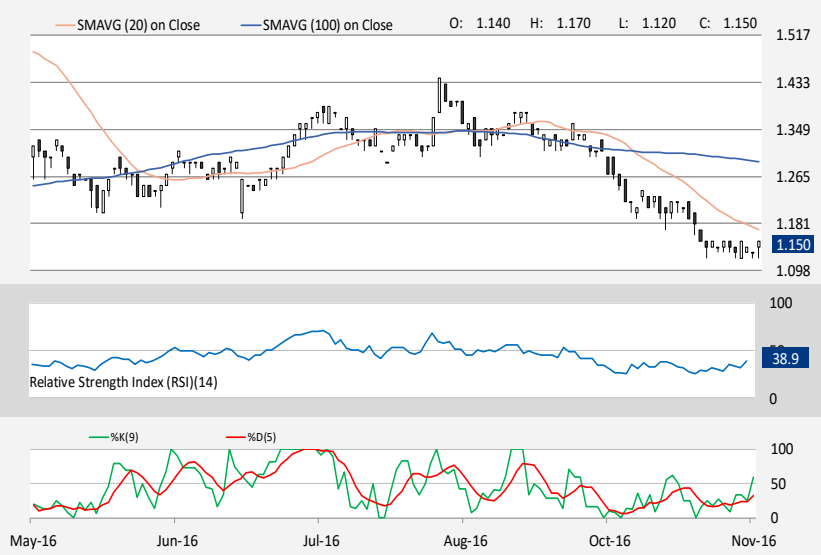

- Following three straight bullish sessions, the stock traded with a bearish bias in the last session and finished at AED1.21.
- On the weekly chart, the MACD is moving upwards along with the RSI and stochastic indicators placed near their overbought regions, hinting at the presence of bullish momentum in the coming week. On the daily chart as well, the MACD and stochastic are trading with a bullish tone, further endorsing the bullish stance.
- Crucial technical resistance is positioned at the AED1.24 level, followed by the daily upper Bollinger band (currently placed at AED1.26) and AED1.28 levels. A move back above the latter might lead to bullish momentum in the stock.
- On the contrary, key intraday support is placed at the AED1.15 level, followed by the AED1.08 and 20day SMA (currently placed at AED1.03) levels. A breach below the latter might generate bearishness in the stock.

Gulf Finance House

- The stock posted marginal gains in the previous session and closed at AED1.40, following a high at AED1.41.
- As seen on the weekly chart, the momentum oscillators are trading at a higher level above their midlines, reflecting at a strong technical picture. On the daily chart, the MACD and RSI are trading with a bullish tone, further supporting the above view.
- Important technical obstacle is located at the daily upper Bollinger band (currently trading at AED1.41), followed by the AED1.45 and AED1.47 levels. A surge above the latter might trigger further strength in the stock.
- However, an upper Bollinger band crossover on the weekly chart indicates that the stock might witness potential correction. Key support is placed at the AED1.35 level, followed by the AED1.30 and AED1.23 levels. A breach below the latter might turn the main trend to bearish.

Dubai Financial Market PJSC

- The stock traded in the positive territory in the prior session and settled at AED1.15, after notching a high at AED1.17.
- Weekly MACD is heading lower along with the stochastic and RSI indicators tranquil below their 50lines, hints at negativity in the coming week. However, a recent signal line crossover from below by the daily MACD accompanied by the RSI oscillator pointing north, indicates at potential recovery in the stock.
- Key resistance to be watched is situated at the 20day SMA (currently placed at AED1.17), followed by the AED1.20 and daily upper Bollinger band (currently trading at AED1.24) levels. A sustained break above the latter might lead to further positivity in the stock.
- On the contrary, crucial support is placed at the AED1.12 level, followed by the daily lower Bollinger band (currently trading at AED1.10) and AED1.08 levels.
