UAE Indices

UAE Market Commentary

- UAE equity markets ended mixed yesterday, as gains in banking sector stocks offset losses in insurance sector stocks.
- Among insurance companies, Islamic Arab Insurance Co. and Methaq Takaful Insurance Co. plummeted 10.0% and 5.8%, respectively. Financial stocks, Shuaa Capital, Amlak Finance and Dubai Financial Market declined 4.1%, 3.5% and 3.0%, respectively.
- Meanwhile, Mashreqbank, First Gulf Bank and Abu Dhabi Commercial Bank advanced 3.9%, 1.7% and 0.4%, respectively.
- GFH Financial Group eased 0.7%. Meanwhile, the firm stated that it is in talks with Shuaa Capital to form a diverse conglomerate with a market capitalisation of about AED9.0 billion and interests ranging from retail and investment banking to broking and property development.
- The Abu Dhabi Securities Exchange (ADX) general index ended 0.1% higher at 4,387.96, while the Dubai Financial Market index closed 0.9% lower at 3,468.58.

Amlak Finance

- The stock traded in the red in the last session and settled below the daily lower Bollinger band (currently placed at AED1.12) at AED1.11.
- On the daily chart, the MACD is trading in the negative region coupled with the RSI and stochastic placed near their oversold areas, hints at bearishness in the coming session. On the weekly chart, the momentum oscillators are trading with a negative bias, further validating the above stance.
- Important support is situated at the AED1.10 level, followed by the AED1.08 and AED1.06 levels. A breach below the latter might trigger further negative momentum in the stock.
- However, a daily and weekly lower Bollinger band crossover indicate at a likely recovery in the stock. Key resistance is placed at the AED1.14 level, followed by the 20day SMA (currently placed at AED1.17) and AED1.19 levels.

Deyaar Development

- Following two positive sessions, the stock traded with a bearish tone in the prior session and ended at AED0.560.
- A possible centreline crossover by the weekly MACD to trade into the negative territory along with the stochastic oscillator trading near its oversold region reflects at a weak technical picture. Moreover, the daily momentum oscillators are placed below their midlines, further affirming the above stance.
- Key support is seen at the AED0.551 level, followed by the AED0.542 and AED0.538 levels. A move back below the latter might lead to further downside momentum in the stock.
- Meanwhile, immediate resistance is placed at the AED0.570 level, followed by the 20day SMA (currently trading at AED0.580) and 200day SMA (currently trading at AED0.590) levels. A break above the latter might trigger positivity in the stock.

National Bank of Abu Dhabi

- The stock traded lower for the fourth straight session yesterday and closed below the daily lower Bollinger band (currently placed at AED10.02) at AED9.90, after falling as low as AED9.75.
- A recent signal line crossover by the weekly MACD from above conjoined with the RSI and stochastic sharply pointing downwards hints at the presence of negative momentum in the coming week. Meanwhile, the daily momentum oscillators are tranquil below their centrelines, further confirming the above view.
- Immediate support is located at the 100day SMA (currently placed at AED9.84), followed by the AED9.75 and AED9.68 levels. A move back below the latter might lead to increased selling pressure on the stock.
- However, a daily lower Bollinger band crossover indicates at potential recovery in the stock. Crucial resistance is placed at the AED10.00 level, followed by the AED10.10 and AED10.25 levels.

ALDAR Properties

- Following the formation of a bearish harami candlestick pattern on the daily chart on Sunday, the stock extended its losses in the previous session and ended at AED2.29, after making a low at AED2.28.
- Currently, the weekly MACD and RSI oscillators are directing south along with the stochastic trading below its oversold territory, reflecting a bearish technical outlook. Also, the daily momentum oscillators are tranquil at a lower level below their midlines, further supporting the above stance.
- Key near-term support resides at the AED2.25 level, a breach below which might trigger a further acceleration to the downside, clearing the way for the AED2.23 (last touched in February 2016) and AED2.21 levels.
- Conversely, key resistance is placed at the AED2.32 level, followed by the AED2.36 and AED2.37 levels. A break above the latter might turn the main trend to bullish.

Damac Properties Dubai Co

- Yesterday, the stock declined for the third consecutive session and finished below the daily lower Bollinger band (currently placed at AED2.75) at AED2.73, after touching a low at AED2.72.
- A possible negative centreline crossover by the daily MACD accompanied by the RSI and stochastic indicators moving south hints at negative momentum in the coming session. On the weekly chart, the stochastic and RSI are showing loss of upward potential, further endorsing the above stance.
- Intraday support is placed at the AED2.70 level, followed by the AED2.67 and AED2.63 levels. A breach below the latter might lead to further weakness in the stock.
- However, a lower Bollinger band crossover on the daily chart suggests at possible recovery in the near term. Key resistance aligns at the 50day SMA (currently trading at AED2.77), followed by the AED2.81 and AED2.84 levels.

Amanat Holdings

- Following a daily lower Bollinger band crossover on Sunday, the stock reversed its trend to bullish and posted mild gains yesterday to close at AED1.14, after making a high at AED1.15.
- A positive centreline crossover by the daily MACD along with the RSI and stochastic oscillators trading with a positive showing reflects at a strong technical scenario. On the weekly chart, the MACD and RSI are trading above their midlines, further affirming the above view.
- Key intraday resistance is situated at the AED1.16 level, followed by the daily upper Bollinger band (currently placed at AED1.17) and AED1.18 levels. A sustained break above the latter might trigger further strength in the stock.
- On the contrary, key support is placed at the 20day SMA (currently trading at AED1.12), followed by the AED1.11 and the 50day SMA (currently trading at AED1.10).
