Gulf Navigation Holding

- The stock traded with a bearish tone in the previous session and closed at AED1.47.
- As visible on the daily chart, the MACD is trading flat below its centerline along with the RSI and stochastic oscillators trading with a bearish bias, hints at the presence of negativity in the near term. On the weekly chart, the MACD and RSI indicators are heading south further endorsing the above stance.
- Important support is placed at the 20day SMA (currently placed at AED1.46), followed by the AED1.44 and AED1.42 levels. A move back below the latter might lead to further bearish pressure on the stock.
- Conversely, key resistance resides at the AED1.50 level, followed by the AED1.53 and the daily upper Bollinger band (currently placed at AED1.54) levels. A break above the latter might lead to upside momentum in the stock.

Union Properties

- Following an upper Bollinger band crossover on the daily chart on Thursday, the stock retreated in the last session and ended at AED1.03.
- Although the daily MACD is heading higher, the RSI and stochastic oscillators are showing loss of upward potential, reflecting at a weak technical scenario.
- Key support is positioned at the 50day SMA (currently placed at AED1.02), followed by the AED1.01 and psychological AED1.00 levels. A breach below the latter might lead to further acceleration to the downside.
- However, the weekly MACD and stochastic indicators are trading with a positive tone, suggesting that the downside might remain limited. Crucial resistance is placed at the 100day SMA (currently placed at AED1.04), followed by the daily upper Bollinger band (currently placed at AED1.05) and AED1.07 levels. A break above the latter might lessen the bearish pressure.

National Bank of Abu Dhabi

- After forming a bearish harami candlestick pattern on the daily chart on Thursday, the stock continued to trade lower in the prior session and settle at AED11.05.
- On the weekly chart, the MACD and stochastic indicators are tranquil at a higher level above their midlines, reflecting at bullishness in the coming week. However, the daily RSI and stochastic indicators are attempting to move out of their overbought regions indicating at potential bearish momentum in the near term.
- Immediate support is situated at the AED10.90 level, followed by the AED10.75 and AED10.60 levels. A move back below the latter might trigger further negative momentum in the stock.
- On the bright side, key intraday resistance is placed at the AED11.15 level, followed by the daily upper Bollinger band (currently placed at AED11.26) and AED11.35 levels.

Eshraq Properties Co

- The stock traded firmer for the fifth straight session yesterday and closed at AED1.18, after making a high at AED1.20.
- With the weekly MACD and RSI indicators tranquil above their midlines, the near-term technical outlook appears to be bullish. Similarly, a possible centreline crossover by the daily MACD to trade into the positive region coupled with the RSI and stochastic indicators pointing north, further confirms the above stance.
- Important resistance is located at the AED1.20 level, followed by the daily upper Bollinger band (currently trading at AED1.22) and AED1.24 levels. A sustained break above the latter might trigger further strength in the stock.
- Conversely, key support is placed at the AED1.16 level, followed by the 50day SMA (currently trading at AED1.13) and AED1.11 levels.

Dubai Investments

- The stock posted marginal losses in the previous session and ended at AED2.53, after touching a low at AED2.52.
- On the weekly chart, the MACD and stochastic oscillators are trading with a positive showing, reflecting at the presence of bullish momentum. However, the daily RSI and stochastic indicators are showing loss of upward potential, indicating at correction in the coming session.
- Intraday support is located at the AED2.51 level, followed by the 50day SMA (currently placed at AED2.49) and AED2.47 levels. A move back below the latter might lead to further downside momentum in the stock.
- On the other hand, the key technical barrier is placed at the daily upper Bollinger band (currently trading at AED2.55), followed by the AED2.57 and AED2.59 levels. A surge above the latter might trigger strength in the stock.

Damac Properties Dubai Co

- The stock traded in the red in the last session and ended at AED2.87, after making a low at AED2.85.
- Even though the daily stochastic is sharply moving lower, the MACD and RSI are trading flat above their midlines, hinting at bullish momentum in the near term. Moreover, the weekly momentum oscillators are trading with a strong bias, further validating the above stance.
- Key resistance is aligned at the AED2.90 level, followed by the daily upper Bollinger band (currently trading at AED2.93) and AED2.95 levels. A clear break above the latter might lead to positivity in the stock.
- Meanwhile, the 50day SMA (currently trading at AED2.83) is acting as an immediate support, followed by the 20day SMA (currently placed at AED2.81) and AED2.78 levels. A breach below the latter might lead to further weakness in the stock.
