UAE Indices

UAE Market Commentary

- UAE equity markets closed mixed yesterday, as gains in the services & property sector stocks were offset by losses in the consumer staples & energy sector stocks.
- Real sector stocks, RAK Properties and Aldar Properties edged up 1.6% and 0.9% respectively. Lenders, Sharjah Islamic Bank, Bank of Sharjah and Abu Dhabi Islamic Bank gained 3.6%, 2.1% and 0.7% respectively.
- On the losing side, industrial sector stocks, Arabtec Holding and Gulf Navigation Holding declined 4.5% and 1.5% respectively.
- Abu Dhabi Commercial Bank announced that its Q1 net profit increased 8%, driven by higher net interest & Islamic financing income.
- The Abu Dhabi Securities Exchange (ADX) general index ended 0.2% higher at 4,522.56, while the Dubai Financial Market index closed 0.1% marginally lower at 3,414.93.

Arabtec Holding

- After trading higher for two consecutive sessions, the stock posted significant losses in the last session and closed at AED 0.859.
- A likely signal line crossover from above by the daily MACD coupled with the RSI and stochastic oscillators trading with a negative showing, indicates bearish momentum in the coming session. Also, the weekly momentum oscillators are trading at a lower level below their midlines, further endorsing the above stance.
- Key support is positioned at the AED0.851 level, followed by the AED0.835 and the daily lower Bollinger band (currently trading at AED0.820). A breach below the latter might lead to further acceleration to the downside.
- On the flipside, immediate resistance is placed at the AED0.872 level, followed by the AED0.887 and the crucial AED0.900 levels. A break above the latter might trigger strength in the stock.

TABREED

- The stock traded in the green for the third straight session yesterday and finished at AED1.93.
- On the daily chart, a potential signal line crossover from below as well as a positive centreline crossover by the MACD coupled with the RSI and stochastic heading higher, reflects at a bullish technical picture. Similarly, the weekly MACD and RSI indicators are trading with a positive bias, further confirming the above view.
- Crucial resistance is placed at the AED1.95 level, followed by the AED1.97 and the daily upper Bollinger band (currently trading at the psychological AED2.00). A break above the latter might trigger further positive momentum in the stock.
- Meanwhile, intraday support is seen at the 50day SMA (currently trading at AED1.91), followed by the AED1.87 and AED1.85 levels. A breach below the latter might lead to bearishness in the stock.

Damac Properties Dubai Co

- The stock posted marginal losses in the prior session and ended below the daily lower Bollinger band at AED 2.52, after making a low at AED 2.50.
- On the weekly chart, the momentum oscillators are trading with a downside tone, hinting at the presence of bearishness in the near term. Likewise, the daily MACD is moving lower along with the stochastic and RSI tranquil near their oversold region further validates the above stance.
- Important support resides at the 200day SMA (currently trading at AED2.51), followed by the AED2.48 level. A move back below the latter might lead to further downside momentum in the stock.
- However, a lower Bollinger band crossover on the daily chart suggests at a likely recovery in the stock. Intraday resistance is placed at the AED2.54 level, followed by AED2.56 and AED2.56 levels.

Gulf Navigation Holding

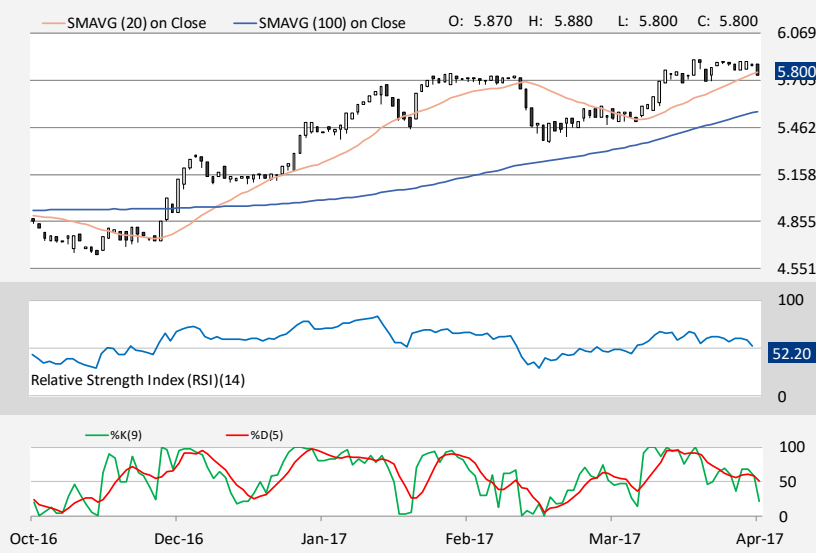

- The stock traded with a bullish showing in the previous session and settled at AED1.30 after hitting a high at AED1.35.
- On the weekly chart, a potential centreline crossover by the MACD to trade into the negative region conjoined with the RSI & stochastic trading below their 50lines, reflects at a weak technical outlook. Additionally, the daily MACD and RSI indicators are trading with a bearish tone, further supporting the above view.
- Immediate support is positioned at the daily lower Bollinger band (currently trading at AED1.28), a clear breach below which might lead to bearish pressure on the stock, clearing its way for the AED1.25 (last touched in November 2016) and AED1.22 levels.
- On the upside, key resistance is placed at the AED1.32 level, followed by the AED1.35 and the 200day SMA (currently trading at AED1.36).

Emaar Properties

- The stock traded in the positive territory in the last session and ended at AED7.28.
- Although the weekly MACD is moving downwards, the RSI and stochastic indicators are trading with a positive tone, hinting at the presence of bullishness in the coming week. On the daily chart, the RSI and stochastic indicators are pointing north, further affirming the above view.
- Important resistance is situated at the 20day SMA (currently placed at AED7.35), followed by the 100day SMA (currently trading at AED7.42) and AED7.49 levels. A sustained break above the latter might lead to further upside momentum in the stock.
- Conversely, crucial support is placed at the AED7.22 level, followed by the 200day SMA (currently trading at AED7.16) and the daily lower Bollinger band (currently placed AED7.11). A breach back below the latter might trigger negativity in the stock.

Dubai Islamic Bank

- The stock traded with a bearish tone in the prior session and settled below the 20day SMA (currently placed at AED5.82) at AED5.80.
- On the weekly chart, the RSI and stochastic are showing slight loss of upward potential, reflecting at a bearish technical scenario. Moreover, a possible signal line crossover from above by the daily MACD along with the RSI and stochastic heading south further validates the above stance.
- Key intraday support is seen at the 50day SMA (currently placed at AED5.78), followed by the AED5.75 and AED5.71 levels. A move back below the latter might trigger further weakness in the stock.
- On the bright side, the key technical barrier is located at the AED5.83 level, followed by the AED5.86 and AED5.90 levels. A surge above the latter might lead to positivity in the stock.
