## UAE Indices

## UAE Market Commentary

- UAE equity markets closed mixed yesterday, as gains in banking, insurance and telecom sectors offset losses in financial, real estate and consumer staples sectors.
- Lenders, Sharjah Islamic Bank, Abu Dhabi Islamic Bank, Union National Bank and Abu Dhabi Commercial Bank added 2.2%, 1.9%, 1.0% and 0.4%, respectively.
- On the losing side, financial stocks, Gulf General Investment Co., Amanat Holdings and Amlak Finance dropped 2.6%, 1.8% and 1.3%, respectively.
- Real estate sector stocks, Union Properties and Emaar Properties shed 1.2% and 1.0%, respectively.
- Shuaa Capital tumbled 5.3%, as GFH Financial Group confirmed its withdrawal from the discussions on potential acquisition of Shuaa, after both the parties could not reach an agreement on the terms.
- The Abu Dhabi Securities Exchange (ADX) general index ended 0.03% higher at 4,484.46, while the Dubai Financial Market index closed 0.7% lower at 3,317.50.

## SHUAA Capital

- Yesterday, the stock opened at a significantly lower level and recorded marginal losses to end at AED1.43, after falling as low as AED1.36.
- A possible negative centreline crossover by the weekly MACD along with the RSI indicator moving downwards, reflects a bearish technical picture. On the daily chart, the momentum oscillators are trading with a negative bias, further validating the above stance.
- Key support is situated at the daily lower Bollinger band (currently trading at AED1.41), followed by the AED1.39 and AED1.36 levels. A breach below the latter might lead to further bearish pressure on the stock.
- On the contrary, key resistance is placed at the 20day SMA (currently trading at AED1.46), followed by the AED1.49 and the daily upper Bollinger band (currently trading at AED1.52). A break above the latter might trigger positivity in the stock.

## Amanat Holdings

- The stock traded with a bearish tone in the prior session and closed at AED1.12, following a low at AED1.11.
- On the daily chart, a potential signal line crossover from above by the MACD coupled with the RSI and stochastic oscillators pointing south, hints the presence of bearish momentum in the coming session. Additionally, the weekly MACD and RSI oscillators are showing slight loss of upward potential, further confirming the above view.
- Crucial support is placed at the 50day SMA (currently trading at AED1.11), followed by AED1.10 and the daily lower Bollinger band (currently trading at AED1.09). A move back below the latter might lead to further downside momentum in the stock.
- On the bright side, intraday resistance is positioned at the 20day SMA (currently trading at AED1.13), followed by the AED1.14 and AED1.15 levels.

## Union National Bank

- The stock traded in the green in the last session and finished at AED4.85.
- With the weekly MACD attempting a signal line crossover from above and the stochastic indicator heading lower, the near-term technical outlook appears to be weak. However, the daily RSI and stochastic indicators are trading with an upside tone, suggesting at potential positive momentum in the coming session.
- The key technical obstacle is located at the AED4.88 level, followed by the 20day SMA (currently trading at AED4.92) and AED4.96 levels. A clear break and stability above the latter might lead to further bullish momentum in the stock.
- On the other hand, important support is placed at the AED4.80 level, followed AED4.75 and the daily lower Bollinger band (currently trading at AED4.70). A breach below the latter might trigger negativity in the stock.

## Emaar Properties

- The stock has been trading lower for past several weeks and continued to decline yesterday to settle at AED7.10, after making a low at AED6.96.
- A likely negative centreline crossover by the weekly MACD along with the RSI and stochastic indicators placed below their 50lines, hints at bearishness in the coming week. Besides, the daily MACD and RSI oscillators are trading with a weak bias, further supporting the above stance.
- Immediate support is seen at the AED7.07 level, followed by the daily lower Bollinger band (currently trading at AED7.04) and AED7.01 levels. A move back below the latter might lead to further acceleration to the downside.
- Meanwhile, crucial resistance is placed at the AED7.15 level, followed by the AED7.19 and the 200day SMA (currently trading at AED7.21). A surge the latter might reverse the trend to bullish.

## Arabtec Holding

- The stock traded firmer in the previous session and closed at AED0.764, following a high at AED0.765.
- A potential signal line crossover by the weekly MACD from below accompanied by the stochastic indicator pointing towards the north reflects a bullish technical scenario. On the daily chart as well, the MACD and stochastic oscillators are trading with a positive showing, further affirming the bullish view.
- Important resistance is placed at the AED0.777 level, followed by the daily upper Bollinger band (currently trading at AED0.790) and AED0.801 levels. A move back above the latter might trigger further positive momentum in the stock.
- On the downside, intraday support is seen at the 20day SMA (currently trading at AED0.750), followed by the AED0.740 and AED0.725 levels. A breach below the latter might lead to weakness in the stock.

## Dubai Islamic Bank

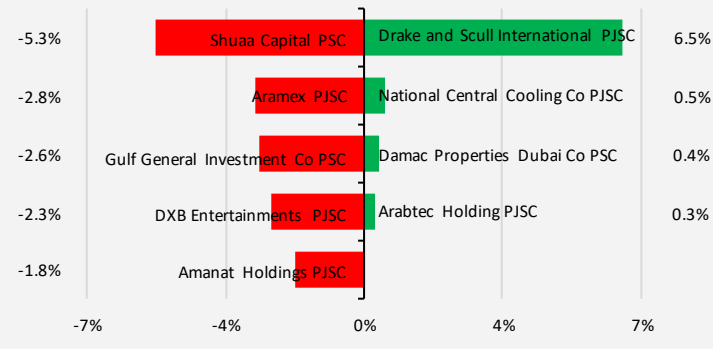

- The stock traded in the red for the second straight session yesterday and settled at AED5.79, after touching a low at AED5.71.
- On the daily chart, a possible signal line crossover from above by the MACD along with the RSI and stochastic oscillators pointing south, reflects a weak technical picture. Similarly, the weekly MACD and RSI are trading with a slightly bearish bias, further endorsing the bearish stance.
- Key support is positioned at the AED5.77 level, followed by the AED5.75 and the daily lower Bollinger band (currently trading at AED5.72) levels. A clear breach below the latter might lead to increased selling pressure on the stock.
- Conversely, key resistance is placed at the AED5.81 level, followed by the AED5.83 and the 100day SMA (currently placed at AED5.85). A break above the latter might trigger bullishness in the stock.
